Talha Malik

MERN STACK DEVELOPER

Rawalpindi, Pakistan

(+92) 336-5459350 | talhamalick19@gmail.com | talhamalik19 | talhamalik19

Summary

MERN Stack Developer with 3 years of experience building scalable and high-performance web applications using React.js, Next.js and Node.js. Strong frontend focus with hands-on experience in REST and GraphQL APIs, JWT authentication. Worked on Core Web Vitals for optimizing the performance. Experienced in e-commerce, POS systems, and CMS-driven applications. collaborating closely with backend teams. Led code reviews and mentored junior developers.

Technical Skills

Frontend Development	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, JSX/TSX, Redux, React Query
Backend & APIs	Node.js, Express.js, RESTful APIs, GraphQL, Authentication (JWT), MongoDB, Web Socket, Webhook
UI/UX & Styling	Tailwind CSS, Material-UI, Bootstrap, Responsive Design, Mobile UI/UX, Figma
Development Tools	Git, GitHub, VS Code, Vite, Postman
AI & Productivity Tools	Cursor, Claude Code, GitHub Copilot, AI-powered Code Review, Automated Testing, Code Generation
Methodologies	Agile/Scrum, Code Review, Technical Leadership, Mentoring, Best Practices, Clean Architecture

Work Experience

Unitedsol (PVT) Ltd. Islamabad, Pakistan

Front-End Developer *Aug. 2023 - Present*

- Developed web applications using React.js and Next.js, with a focus on crafting user- friendly and visually engaging interfaces.
- Employed React.js and Next.js to generate reusable UI components, thereby improving the maintainability and scalability of the codebase.
- Implemented responsive designs to ensure seamless user experiences across various devices and screen sizes, prioritizing accessibility and inclusivity.
- Collaborated closely with backend teams to integrate frontend and backend functionalities using Next. js's built-in features and API routes.
- Conducted thorough testing and debugging to ensure high-quality, bug-free frontend code.
- Actively participated in design discussions, providing valuable insights and recommendations to improve user interface design and usability.
- Led Junior Developers, Conducted Code Reviews

Projects

FMEEXTENSIONS E-commerce website

React.js, NEXT Js, REST APIs, GRAPHQL APIS, MAGENTO 2 Backend

- Developed and implemented the front-end for a fully dynamic e-commerce website, integrating it with a Magento 2 back-end and delivering a fully responsive, user-friendly interface.
- Implemented a fully dynamic website architecture, enabling effortless scalability, flexible content management, and smooth product catalog handling.
- Optimized site performance and Core Web Vitals (LCP, CLS, TBT), improving page speed, responsiveness, and overall user experience across devices.
- Conducted speed optimization through code refactoring, caching strategies, and image compression, ensuring faster load times and higher performance scores.
- Provide ongoing maintenance and technical support, including bug fixes, feature enhancements, and system updates.

EXTENDONS E-commerce Website

React.js, NEXT Js, REST APIs, GRAPHQL APIS, MAGENTO 2 Backend

- Developed the front-end of the e-commerce website using Next.js, ensuring a fast, responsive, and user-friendly design.
- Integrated the Next.js front-end with the Magento 2 back-end.
- Handled the cart functionality for easy user experience.
- Implemented multi-currency and multi-language support, making the website accessible to international users.
- Improved site speed and Core Web Vitals by optimizing code and caching strategies.
- Assisted junior developers by reviewing code, solving technical issues, and sharing best practices.
- Actively involved in team discussions, contributing ideas and solutions during development.

JUICE STATION Corporate Website

React.js, Next.js, Strapi

- Built the website from scratch using Next.js and TypeScript with a fully responsive design.
- Integrated Strapi CMS for dynamic content management.
- Created reusable React components for scalable development.
- Handled complete development, deployment, and support.

BASEER POS POS | Admin System

React.js, NEXT Js, Electron Js REST APIs, GRAPHQL APIS, MAGENTO 2 Backend

- Developing a POS system with Next.js front-end integrated into a Magento 2 back-end.
- Utilized Electron Js for developing a desktop application.
- Implemented full supply chain process to handle the stocks, inventory and suppliers.
- Implemented full offline support for smooth login to checkout process.
- Implemented dynamic product listing, cart, and checkout workflows.
- Added support for discounts and custom product options.
- Focused on speed, scalability, and a seamless user experience.
- Ensuring secure transactions and smooth order management.
- Implemented Real-time orders and product sync.
- Implemented Web Sockets for real time response.
- Implemented dynamic architecture suitable with any system.
- Providing ongoing support to around 15 POS systems.

Education

NUML (National University of Modern Languages) Islamabad, Pakistan

Bachelor's in Software Engineering *Feb. 2019 - Jan. 2023*

- CGPA: 3.59/4.0
- Relevant Coursework: Software Engineering, Database Systems, Web Development, Mobile App Development
- Final Year Project: Full-stack MERN application with React Native mobile app, featuring RESTful APIs and real-time functionality
